

Review Form 1.7

Journal Name:	Journal of Economics, Management and Trade
Manuscript Number:	Ms_JEMT_109152
Title of the Manuscript:	Determinants of Industrial Automation Adoption in Bangladesh's Manufacturing Sector
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The manuscript explores the determinants of industrial automation adoption in Bangladesh's manufacturing sector, which is a relevant and significant topic in the context of Industry 4.0. It contributes valuable insights into the challenges and opportunities faced by a labor-intensive economy like Bangladesh in adopting automation technology. However, the importance could be better emphasized in the introduction section.</p> <p>The title is suitable but could be improved for clarity and conciseness. Consider a title like "Determinants of Industrial Automation Adoption in Bangladesh's Manufacturing: An Empirical Study."</p> <p>The abstract provides a concise summary of the study, including the research methodology and key findings. However, it could benefit from a brief mention of the practical implications of the research.</p> <p>The manuscript's structure seems appropriate, with sections dedicated to the introduction, literature review, theoretical framework, empirical framework, results, and conclusion. However, it might be helpful to include subsections within these sections to improve readability.</p> <p>The scientific correctness of the manuscript appears sound based on the methodology and data analysis presented. However, it would be helpful to provide more details on the data sources, econometric models used, and statistical tests applied.</p> <p>The references appear relevant to the topic, but it would be beneficial to ensure that the most recent research on industrial automation adoption in similar contexts is included. Additionally, please provide more complete citation details for all references.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The overall language quality is suitable for scholarly communication. However, there are occasional grammar and syntax issues that need to be addressed. Proofreading and language editing would enhance the manuscript's readability.</p>	
<p>Optional/General comments</p>		

Review Form 1.7

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
