Justify the study by stating the weight of test items on geometry in mathematics exams in the introduction section. 2. Begin sentences in objectives with capital letters. 3. It is not grammatically and scientifically sound to state that research questions were answered using means and standard deviations as indicated in method of data collection section. 4. Interpretation of standard deviation is missing under descriptive statistics section. 5. Reporting of F statistics is not APA compliant. 6. Recommendations are generalized to teaching and learning of mathematics yet the study is a case study of Geometry.
