The manuscript is good and the topic is important for scientific community. 2. The title is good. However, it should not include software engineering since the authors did not bring any evidence that they used their model on a software engineering course. 3. The abstract is not well written at all. The authors tried to bombard it with all details, which should not be the case since it is an abstract. 4. The subsections and the structure of the paper is 50% good. The organization is not good enough to be published. 5. The manuscript is correct scientifically. However, it needs to be well organized and structured well. 6. The references are old. 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	The language is good.	
<p>Optional/General comments</p>	The authors should provide evidence of applying the model on Software engineering course. Further, they have to state screenshots to show how it was done. The authors should rewrite the abstract. On the other hand, the introduction should include the sections of the article.
