

Editor's Comment:

Kindly find the editorial comments:

1- Study the effectiveness of Tai Chi as a complementary and integrative medicine with depression symptoms, psychiatric symptoms, and physical symptoms using quasi-experiment investigation of an occupational therapy on traumatic brain injury, posttraumatic stress disorder and chronic musculoskeletal pain, peer-led diabetes self-management program, spirituality, mind-body medicine skills, mindfulness facets and empathy enhancement programs in healthcare programs.

2- The objective must be cleared out.

3- The Significance statements must be provided in proper places.

4- There are some language barriers.

5- Better connect your manuscript to previous works by citing the following publications:

1. Book chapter: 2008. Tai-Chin Chi Kung. Alternative Therapies for Medical Professionals.

2. 2015. Effectiveness of intensive healthcare waste management training model among health professionals at teaching hospitals of Pakistan: a quasi-experimental study. BMC Health Services Research.

3. 2017. Syrian medical legislation impacts stories on pharmacy in the millennium. Chronicles of Pharmaceutical Science 1(5), 307–311.

4. 2018. Syrian Case Study: Behçet's Disease clinical symptomatologies, ocular manifestations, and treatment. Chronicles of Pharmaceutical Science 2(2), 502–509.

5. 2018. Face-to-Face and Distance Education Modalities in the Training of Healthcare Professionals: A Quasi-Experimental Study. Frontiers in Psychology.

6. 2018. In modern ocular pharmacology-dexamethasone the top active corticosteroid. EC Pharmacology and Toxicology 6(6), 463–468.

7. 2018. Beyond pain, fear, withdrawal-findings, and problems involving change - treatment and application for a chronic addiction on alcohol do not end. Drug Designing & Intellectual Properties International Journal 2(1), 1–9.

8. 2020. The Role of Empathy in Health and Social Care Professionals. Healthcare.

9. 2022. An Empirical Study on Determining the Communication and Empathy Skill Levels of Healthcare Professionals. Konuralp Tıp Dergisi.

10. 2022. Effect of Antenatal Counselling by Healthcare Professionals in Initiating Precise Early Breastfeeding Practices in Primigravida Mothers: A Quasi-experimental Study. INDIAN JOURNAL OF NEONATAL MEDICINE AND RESEARCH.

7- The Discussion including interpretations must be strengthened.
