(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The manuscript presents a rare pathology that surprise every surgeon every once in a while. Although the case presented does not differ from the rest of the cases presented in literature, the manuscript has a suitable title, the abstract is comprehensive and the structure is appropriate for a case presentation. The discussion section could have been a bit longer - differentiation between primary and secondary Sclerosing Encapsulating Peritonitis, additional causes of the illness, various cases presented in literature before and their outcomes. Also, histology findings should have been presented both for the fibrous membrane and also for the latero-uterine mass you described – it is unclear from the text what was that formation and what was the attitude towards it.</p> <p>The biography needs to be extended in my opinion.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Needs extensive syntax, grammar and spelling proofing before printing	
<p>Optional/General comments</p>
