	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes the manuscript is important for the scientific community</p> <p>Yes, title is suitable</p> <p>Yes, the abstract is comprehensive and to the point</p> <p>Yes</p> <p>Yes</p> <p>yes</p> <p><b>Table 2: Sociodemographic Determinants of STDs :</b> It seems that the researcher is mistaken with the STDs!</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>yes</p>	
<p><b>Optional/General</b> comments</p>	<p><b>In table 2:</b> I would recommend to list the risk factors with the highest prevalence first, then the less prevalent ones. This way it is easier to the reader to spot them.</p> <p>In <b>Discussion:</b> elaborate more about the prevention strategies</p> <p>Note: The research has a good number of participants and including all parts of the country required huge efforts. if the researcher can identify the prevalence difference of risk factors among different age groups, and among different sexes would strengthen the research but is not a most.</p>
