

Review Form 1.7

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_109142
Title of the Manuscript:	Efficacy and Safety of Stem Cell Therapy in the Treatment of Fistulizing Crohn's Disease: A Systematic Review
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Use of stem cells for the treatment of Crohn's disease remain a disputable matter Thus any publication on this theme is welcomed</p> <p>Efficacy and Safety of Stem Cell Therapy in the Treatment of Fertilizing Crohn's Disease and the role of autologous stem cell transplantation: A Systematic Review is more accurate</p> <p>The whole abstract should be focused in stem cell transplantation especially in fistulising disease The introduction should be reduced as well as conclusions The results should summarise the main findings</p> <p>The introduction should focus mainly in fistulising CD giving also some hints from laboratory studies why stem cell treatments might workThe results session should be rewritten The authors should organise the main findings for fistulising CD during the main time points of the studies They should also present were available the finding separately for patients on and off anti-TNFs Thereafter should follow the side effects Finally they should present the results of the autologous transplantation trial Discussion should summarise the results and give the perspectives for the future</p> <p>References 13 and 19 are from the same study Reference 14 is for Tx of Graft vs Host Disease, therefore it is irrelevant Finally references 17 and 20 also are from the same study. Moreover, reference 13 is from Panés J not Ascanelli A. Numbers should adapt accordingly Farge D, et al. Autologous hematopoietic stem cell transplantation for autoimmune diseases: an observational study on 12years' experience from the European Group for Blood and Marrow Transplantation Working Party on Autoimmune Diseases. Haematologica 2010;95:284–92.</p> <p>Hillary SA, et al. Clinical practice guideline for the medical management of perianal fistulizing Crohn's disease: the Toronto consensus. Inflamm Bowel Dis. 2019;25:1–13.</p> <p>Cadeddu F, et al. Complex anal fistula remains a challenge for colorectal surgeon. Int J Color Dis. 2015;30:595–603</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The language needs some polishing</p>	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
