

**Editor's Comment:**

The reviewed manuscript (2023/ARRB/109234) entitled, "Antibacterial and Phytochemical Properties of Clove Extracts on Vegetable Spoilage Bacteria" for a final decision. I am very pleased to read this innovative piece of research work and found that the authors have followed the majority of the scholastic comments/suggestions raised by the reviewers as well as improved their manuscript in a worthwhile manner. However, there are still some minor mistakes/errors in wordings and languages as well as formatting/arranging of tables and figures, citations and references, which are needed to be corrected and revised before final printing. Therefore, I recommend the manuscript for publication in Annual Research & Review in Biology with minor revisions. Hope, you will agree with my decision and also will take needful actions towards its acceptance and publication.
