Paddy is one of the most important cereal crops in the world. Chhattisgarh's main crop in terms of both production and consumption is paddy. The cost of cultivation of rice in this region is high and major constraint faced by paddy producer was large number of family member, small size of farm holdings, high value of land, Labour cost (human, bullock and machine labour), and High hybrid seed cost, chemical fertilizer and other environmental factor of this region. Suggested by the farmer was availability of local and improved variety of paddy should be maintain the organic farming and their ecosystem, Chemical fertilizer replaced by the FYM and worm compost, Labour costs can be reduced by using machinery equipment.</p> <p>2. I think that the discussion needs more explanations of the result obtained.</p>
