

Editor's Comment:

The Manuscript Title: Seroprevalence of Hepatitis C virus in the urban commune of Kindia-Republic of Guinea

Although all suggested changes are incorporated it's need to be added more discussion in discussion section. This discussion is not enough for quality publication. Also I shared linked to check paper for your references. https://www.researchgate.net/profile/Amber-Afroz/publication/256120622_Prevalence_of_Viral_HBV_and_HCV_Among_Different_Group_Patients_in_Gujrat_Pakistan/links/0c960523bdfb4455f8000000/Prevalence-of-Viral-HBV-and-HCV-Among-Different-Group-Patients-in-Gujrat-Pakistan.pdf

Accepted with minor revision.
