

Editor's Comment:

Another excellent paper which must be published in your most respected journal as suggested and recommended by the respected peer-reviewers. Their comments have significantly improved the paper. Under 6. Discussion, 5.2 Cognitive Breath must be read as 6.2 Cognitive Breath. It is advisable to have some recommendations so that 7.Conclusion shall be read as 7. Conclusion and Recommendations with 8. List of References. The pages of the article must be numbered as well. Otherwise, I can't see any additional flaw in the research paper and it is recommended for publication.
