If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p> | <ol style="list-style-type: none"> Yes, although similar reviews have been published in the past, this paper expounds them from a different perspective, this paper has certain value, the shiatsu technique is elaborated, and has important reference value for future clinical application and development. Yes, it is appropriate to consider adding specific literature analysis methods to the title. The abstract part is more comprehensive, which summarizes the specific content and significance of this paper in detail. The subsections and structure of the manuscript are appropriate. However, it is suggested to increase the analysis of possible deviations in literature data, and specify the deviation analysis and treatment methods, and describe the process and method of literature data review analysis. Yes, the manuscript is scientifically correct. According to the requirements of this paper, the references basically cover the relevant research in recent years. | |
| <p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? | English quality of the article is suitable for scholarly communications, but some of the expressions are questionable, and the suggestions are more perfect. | |
| <p>Optional/General comments</p> | This paper is a systematic review of shiatsu therapy. The topic selection is relatively novel and cutting-edge, and the summary of the current research situation is relatively in place, which has certain influence and contribution. The paper has a strong logical structure and appropriately increases the rigor of the written expression. | |
