EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
1. A minor inclusion is needed from the authors. The authors need to add a small detail of how the data were analyzed at the end of the methodology section. Currently, it doesn't have any details.	I would like to thank you for your valuable suggestions that clarify the procedure of analysis and strengthen the methodological part of this article. I have revised the article added some more information in the opinion of your comment.
