The title: "Laundromats in Bangkok Real Estate Centric Services An Industry Emerging In Response to Covid-19" may somehow not appear to be of immediate importance to the scientific community as it lacks clarity and conciseness in as much as the intended purpose of the article is concerned vis-à-vis article content, making it challenging to discern the focus and relevance of the research or topic. To make it more appealing to the scientific community, it should be revised to clearly convey the subject matter and its significance.</p> <p>2. Suggested alternative title: "THE RISE OF LAUNDROMATS IN BANGKOK IN RESPONSE TO COVID-19"</p> <p>3. While the abstract of the article is comprehensive, if possible, keywords should be limited to five (5) or six (6) words only that can highlight/capture the gist of the article.</p> <p>4. Subsections and structure of the manuscript are appropriate.</p> <p>5. Manuscript is scientifically correct.</p> <p>6. Kindly re-arrange the cited references in such a way that it will follow the latest APA Format. References are sufficient but some are not recent. You may want to look for a more recent one should there be a need to replace older years.</p>

Is language/English quality of the article suitable for scholarly communications?</p>	<p>Considering the factors in the determination of the language and English quality of the article, it was generally observed that almost all are clear and precise, demonstrates adherence to specific academic style guide, and have logical and organized structures.</p>

Please delete the other remaining same words;</p> <p>5. On literature review part, you may want to consider having a narrative presentation instead of figures.</p>
