

Editor's Comment:

I have a few comments on this manuscript as follows:

1. The images of the DNA electrophoresis gel should be improved and analyzed properly (Figs. 1-3). These seem to be the raw data without analysis.
2. Fig. 4: What is the word (value) above the columns of this graph? What is the unit for the y-axis and the line of the y-axis that should be created in Figs. 4 and 5?

If the authors address these comments, we can accept the manuscript for publication in the journal.

Editor's Details:

Dr. Mohamed A. Hassan

Associate Professor, Genetic Engineering and Biotechnology Research Institute (GEBRI), The City of Scientific Research and Technological Applications (SRTA-City), Egypt.
