But kindly mention the importance of those parameters like solasodine, total phenols etc.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Language is fair. But needs some corrections in writing the sentences</p>	
<p>Optional/General comments</p>	<p>The study consists of only genetic parameters which is a simple and basic work. In my view it is not sufficient to publish such a minimum data as a research article in the reputed journal like this. It may be consider as a paper when the author provides information on the correlation of individual trait to the economic yield and also path analysis or some more data to be included. Finally the decision lies with the editor.</p>
