

Editor's Comment:

I have gone through it and the review reports. While the paper has potentials for publication, I suggest a revised submission that I would like to go through. While revising, please consider the following points and DO USE TRACK CHANGE so that the changes made are easily identified.

1. Please improve the overall writing. Currently, the language is poor in many places.

2. The methodology section appears to be very briefly described.

Consider using COREQ or SRQR to report this section. Also, the authors need justification for selecting purposive sampling.

3. Please follow proper referencing format throughout the list.
