

Editor's Comment:

The manuscript 2023/AJAEES/106173 is interesting and has been improved in the revised version. As I checked, the authors took into account partly the comments and suggestions of the reviewers. However, it is necessary:

1. authors to enrich the manuscript with more references as both reviewers suggested but the authors did not follow these suggestions
2. explain, why the six Tables are presented after the conclusions. Are these Tables in an Appendix? Please transfer the Tables in the appropriate point into the manuscript
3. enrich the conclusion section with research limitations, future research and proposals for relevant policies.
4. there are no presented comparison between research findings with results of similar studies national and international oriented in the discussion part.

My decision is the paper to be published after major revision.
