

Review Form 1.7

Journal Name:	Asian Journal of Economics, Business and Accounting
Manuscript Number:	Ms_AJEBA_106873
Title of the Manuscript:	THE INFLUENCE OF DEVELOPMENT AND ALTERNATIVE SOLUTIONS FOR THE DEVELOPMENT OF SMALL AND MEDIUM INDUSTRIES IN HULU SUNGAI TENGAH DISTRICT
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> 1. It seems yes, if there are some arrangements, adjustments and corrections are done. 2. Not completely, as we can see two same words meaning "Development" are used incorrectly! if it could be entitled as: "<u>THE INFLUENCE OF ALTERNATIVE SOLUTIONS FOR THE DEVELOPMENT OF SME's IN (name of the country) HULU SUNGAI TENGAH DISTRICT (as a case study)</u>". This seems more appropriate and clear. Instead of using "<u>SMALL AND MEDIUM INDUSTRIES</u>" we can replace it with "<u>SME's</u>" which is the short form of "Small and Medium Size Enterprises". When the name of the country will appear in the title of the manuscript and also the keywords it will help the researchers to better and easier find the article! This will speed up the process. So as we can see frankly and logically speaking the title of the manuscript should be rearranged and adjusted again for a better function. 3. Some adjustment should be made so that the abstract of the manuscript will be appropriate which are: <u>a.</u> the definition of the study area and its characteristics in brief, <u>b.</u> research methodology as a standard context, <u>c.</u> future research topics for other scientists to continue the work and as such. 4. It seems that the conclusion section should be completed and much more detailed. The research methodology section should be refined and well defined and as such. 5. After consideration of corrections yes it would be scientifically correct. 6. The most recent references used in this manuscript goes back to the year 2018. There are much more recent and up-to-date references which the author of this manuscript should add to the article to increase the scientific quality of the manuscript which is mandatory. 7. Using "<u>SME's</u>" which is the short form of "Small and Medium Size Enterprises" and as such words and terminology in the keywords to help the related scientists to easily find their needs on the research basis. 8. The manuscript should be edited from literal and technical point of view. 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	<ol style="list-style-type: none"> 1. The manuscript should be edited from literal and technical point of view. 	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
