

Review Form 1.7

Journal Name:	International Journal of Research and Reports in Dentistry
Manuscript Number:	Ms_IJRRD_106617
Title of the Manuscript:	Submandibular Sialolithiasis: Multiverse Presentation Of Four Cases
Type of the Article	Case study

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The case study is an important contribution to the scientific literature. It provides valuable information about the incidence of Middle Mesial Canal in the Mandibular First Molar in the Tunisian population , and it can help clinicians to better treat the mandibular first molars.</p> <p>Title of the manuscript is suitable. It is clear, concise, and informative, and it accurately reflects the content of the manuscript. The abstract is clear and concise summary of the case study. It is comprehensive enough to be informative to a general audience, but it is also detailed enough to be useful to clinicians who are interested in learning more about the occurrence of middle mesial canals in mandibular first molars. The substructures and sections are appropriate and relevant to the topic.</p> <p>Overall, the manuscript is well-written, scientifically correct, and provides a valuable contribution to the literature on incidence of canals mandibular first molars. The references in the manuscript are sufficient and recent. They are from high-quality journals and have been peer-reviewed. They also reflect the latest research on incidence of middle mesial canals and distal canals in mandibular first molars. The language and English quality of the article are generally suitable for scholarly communications.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 		
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
