

Review Form 1.7

Journal Name:	International Neuropsychiatric Disease Journal
Manuscript Number:	Ms_INDJ_105792
Title of the Manuscript:	Psychimmunological Aspects and Quality of Life in Patients with Irritable Bowel Syndrome
Type of the Article	Original Research Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> 1. This manuscript has an interesting topic and potential to be published in INDJ. It has an urgency for scientific community. 2. Yes. 3. Yes, but the author(s) need to add discussion after result. 4. Yes. 5. Yes. 6. Yes. 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	<p>Yes.</p>	
<p>Optional/General comments</p>	<p>Dear author, I highly appreciate your hard work on this manuscript but I have few remarks:</p> <ol style="list-style-type: none"> 1. Provide 3-5 keywords according to MeSH Terms and sort it alphabetically. 2. Add the formulation to determine the sample size consisting of the 80 participants. 3. Mention the sampling method, is it a random or non-random. 4. Why are the sample sizes in the observed and control groups different? Besides, the control group was not differentiated by age like the observed group. Please explain this. 5. Use the latest version of SPSS (SPSS 26 are available for Windows). 6. Has the author performed normality and homogeneity tests? Please add what normality and homogeneity tests were done. 7. The titles in table 1 are inconsistent, if you use size 12 then all letters have to be in size 12, not 14. 8. Consider to change Figure 1 to a 2-Dimension form. 9. Your discussion only lists other studies that have consistent and inconsistent results with your research but does not explain why those results happened. The author(s) need to add an explanation of why IBS can increase depressive symptoms, and many more. Consider to rewrite the discussion section. 10. For journal references use the last 5-10 years. Either delete or substitute reference number 1, 4, 7, 9, 12, 16, 17, 18, 19, 20, 23, 24, 27, 28, 33, 36 and 39.
