

Editor's Comment:

Authors have addressed the concerns raised by the reviewers, although only one reviewer had suggestions. However, this manuscript needs critical English grammar improvement. For example in Abstract only, following are the grammatical suggestions:

1. Title - delete "METHANOL/DICHLOROMETHANE"
2. In the first paragraph change 'animal's' to 'animal'.
3. First line of Abstract Methodology should be "Phytochemical screening and the toxicity study of methanol/dichloromethane extract of *Triumfetta cordifolia* roots was performed".
4. Third sentence of abstract Methodology should be "in vitro anti-inflammatory activity was evaluated using bovine serum albumin (BSA) denaturation method and in vivo on carrageenan-induced oedema.

After careful editing of the manuscript, it is recommended for acceptance.
