

Review Form 1.7

Journal Name:	Asian Journal of Advances in Agricultural Research
Manuscript Number:	Ms_AJAAR_107134
Title of the Manuscript:	Smallholder farmers' perception of agrometeorological application at municipality level: South Africa
Type of the Article	Original Research Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes</p> <p>Yes, but not match with goals and objectives of the study</p> <p>No, unfortunately abstract talk only on the purpose of the study, where is the methods, results and</p> <p>To some extent, the introduction part is very long.</p> <p>To some extent</p> <p>Yes</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	<p>To some extent</p>	
<p>Optional/General comments</p>	<p>The purpose for this analysis was to determine local climate related challenges, gaps, shocks and barriers. The survey further, identified agricultural practices, climate risks, access to climate related advisories, access to other scientific knowledge and factors hindering sustainability, stability, and profitability. We further discussed the importance of drought in situ monitoring since drought was identified as the measure limiting factor to agricultural productivity. This review challenges the existing dissemination on scientific knowledge and the accessibility of agrometeorological application to smallholder farmers. Further research seek to overcome the constraints limiting the adoption of climate smart agriculture, agrometeorological application, and minimise climatic risks and improve smallholder agricultural production.</p> <p>The purpose of this investigation hopes to identify the needs of the farmers by using smallholder level data to examine vulnerability to changing climate, and agricultural practices. Sorry , what is the main goal of this study????????????????????? What need to study ?????????? this too much objectives</p> <p>Qualitative data was collected by the adoption of closed ended and open-ended questions in a form of a structured questionnaire. Seven focused group discussions were held in all selected local municipalities. How can be qualitative study, which type of qualitative tool used ?????????????? which is main type of study quantitative or qualitative????? Pls. clarify</p>
