

Review Form 1.7

Journal Name:	Asian Journal of Research and Reports in Gastroenterology
Manuscript Number:	Ms_AJRRGA_107129
Title of the Manuscript:	Distal Esophageal Squamous Cell Carcinoma: A rare, but possible localisation
Type of the Article	Case report

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. The authors describe the diagnosis of and treatment of a more unusual esophageal cancer.</p> <p>2. The title is suitable.</p> <p>3. The abstract is suitable but the authors need to in general check English spellings (see for example Conclusion in Abstract: Should be Conclusion).</p> <p>4. The structure of this manuscript is acceptable but further information is needed:</p> <p>A. In the Clinical History, the authors provide no information about dysphagia: Solids, Liquids, Pill?; substernal versus oropharyngeal; has there been self-induced vomiting? In the Clinical History, the authors do not provide information about the potential weight loss? In the Clinical History, alcohol intake is generally provided as a description of grams of alcohol per period of time. In the Clinical History, the SI units for albumin should be g/L. In the Clinical History, the sentence that begins with "A thoracic CT showed" should be broken up into 2 sentences.</p> <p>B. In the Discussion the authors should describe this patient's expected prognosis based upon TNM staging and previously published statistics.</p> <p>C. In the Discussion, the word anamnesis is not a common medical term and so please consider instead "the patient's history".</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Yes	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
