

Review Form 1.7

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_106122
Title of the Manuscript:	Physico-chemical characteristics of soil as affected by organic amendments in coloured capsicum grown under greenhouse conditions
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Authors of the manuscript Physico-chemical characteristics of soil as affected by organic amendments in coloured capsicum grown under greenhouse conditions He studies the effect of various fertilizers, both chemical and organic, in combination with biological ones. In the publication, the author tries to examine the influence of experimental factors on the content of mineral nitrogen, assimilable forms of phosphorus and potassium and other physical and chemical parameters of the soil, as well as determines the amount of N, P and K uptake by pepper. In the future, every source of nutrients will be important, therefore knowledge about the impact of various fertilizing substances on plants and soil is important I have marked the comments in the text.</p> <p>2. "The effect of different types of fertilizers on the physicochemical properties of the soil and on the uptake of N, P, K by coloured capsicum"</p> <p>3. After the amendment</p> <p>4. yes 5. After corrections 6. yes</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	ENGLISH NEEDS TO BE IMPROVED	
<p>Optional/General comments</p>	In the introduction lacks literature on soil, very poor experimental methodology, no description of the experimental object, no methodology for chemical analyses, the other comments are in the text	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
