<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. The review article is generally well written and structures. It describes some aspects of the pathogenesis of Alzheimer diseases and mention the expected role of keto diet in protection or improving its the signs and symptoms.</p> <p>2. Yes</p> <p>3. Yes</p> <p>4. Yes</p> <p>5. Acceptable</p> <p>6. No. Actually, the references are few. Also, each paragraph should have its own references. The article mostly written without references and the references were written at the end.</p> <ul style="list-style-type: none"> - Alzheimer disease abbreviated in different ways through the article. I suggest to unify the way to write it (for example AD) and this to be corrected throughout all paragraphs - Few grammar mistakes should be corrected 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Acceptable	
<p>Optional/General comments</p>
