

Review Form 1.7

Journal Name:	South Asian Journal of Research in Microbiology
Manuscript Number:	Ms_SAJRM_106066
Title of the Manuscript:	MICROBIOLOGY OF ANTIBIOTIC RESISTANT BACTERIA FROM ORGANIC FERTILIZED FARM SOILS AND WATERLEAF (Talinum triangulare) IN ALUU, RIVERS STATE.
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes.</p> <p>Suitable .</p> <p>Ok</p> <p>Yes.</p> <p>Yes.</p> <p>Adding more recent and relevant references is recommended</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>It is highly recommended to have the paper grammar-checked and undergo stylistics and editing.</p>	
<p>Optional/General comments</p>	<p>Overall, this paper provides valuable insights into the presence and prevalence of antibiotic resistant bacteria in organic fertilized farm soils and waterleaf in Aluu, Rivers State. The study effectively analyzes the bacterial population, prevalence of bacterial isolates, susceptibility patterns, and molecular identification of resistant genes. The findings highlight the potential risks associated with the use of antibiotics in agriculture and the spread of antibiotic resistance through soil and vegetables. The discussion is well-supported by relevant literature and the conclusions are well-founded based on the study's results. The paper's comprehensive approach and thorough analysis make it a valuable contribution to the field of microbiology and antibiotic resistance.</p>
