

Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_108183
Title of the Manuscript:	Assessment of genetic variability parameters for yield and its components under normal and late sown conditions in chickpea (Cicer arietinum L.)
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes, for the crop imporvment</p> <p>No, very complicated title, the word assessment is not suitable for research title. If I understood the meaning well, I suggest this title (Effect of genetic variability parameters on chickpea production.) or (the role of genetic variability on crop improvement)</p> <p>To some extent, needed to be write as a</p> <p>To some extent needed to ordering or organizing</p> <p>Yes</p> <p>Yes, but needed to be write scientifically.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>To some extent</p>	
<p>Optional/General comments</p>	<p>Assessment of genetic variability parameters for yield and its components under normal and late sown conditions in chickpea</p> <p>The objective of the study was to estimate magnitude of different parameters of genetic variability for yield and its attributes. sorry what u need to study becuse there is two different words and meaning (assessment – estimate). there no relation between the title and objective.</p>
