<p>Optional/General comments</p>	<p>Why not combine both mango and passion fruits in your discussion in the introduction You may want to insert a map under the study area You will need to explain the three types (direct marketing, intermediate marketing, and the use of collective action) of your dependent variable very well I think a structured questionnaire should be written rather than a semi-structured questionnaire Can a farmer select more than one outlet, if so, then the use of MNL model is problematic</p>
