<p><b>Compulsory</b> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. This manuscript presents 3 interesting cases of giant PCa. However, some clarification are needed:</p> <p>a) how can the authors rule out that the cases were not actually Giant BPEs with PCa areas? This MUST be addressed</p> <p>b) More details of each case would be helpful (such as pathology reports: number of positive fragments, % of fragment involved, etc)</p> <p>c) I would suggest to add some post-treatment PSA levels and CT images of the cases to show how effective androgen deprivation was. Also, it would be more interesting to the readers to have more references on the literature of treatment options (surgical, radiotherapy, etc) and results.</p> <p>2. Yes</p> <p>3. Yes</p> <p>4. Yes</p> <p>5. Yes</p> <p>6. No. Some references I would suggest (more could be added):</p> <p>a) Prostate Cancer in a Patient with Giant Prostatic Hyperplasia: The Robotic Approach to a Difficult Problem.
