Resulted data, identified that 200 µg/ml of the tested Sri Lankan Traditional Medicine pill showed the highest anti-inflammatory activity against the denaturation of protein. Furthermore, the effect against albumin denaturation in high-concentration Sri Lankan STMP (200 µg/ml and 1000 µg/ml) surpassed that of the reference drugs, signifying a more pronounced impact.</p> <p>The results are well organized with good conclusion, the author need to increase their introduction and enhance the resolution of the graphs then the paper could be accepted for publication.</p>
