<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>yes</p> <p>Yes</p> <p>Yes</p> <p>No The objective is to determine Hb. and Ferritin level; While results do not show ferritin levels, Hct is analysed which was not mentioned in the objective or methods Needs improvements.</p> <p>Yes</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Needs improvements, especially in the discussion. the comparisons of the study results with literature review needs improvement</p>	
<p>Optional/General comments</p>	<p>The name of city and country should also be mentioned. In introduction the cord clamping in preterm is also reviewed this is not the part of objective as the studies conducted in the term neonates. It does not add any value to the study and hence can be edited. Results and discussion are not aligned with the objective as serum ferritin levels are not reported or discuss.</p>
