(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<ol style="list-style-type: none"> 1. The article is well structured, but it needs a series of edits, which I will mention below. 2. Determine the inclusion and exclusion criteria for the control and intervention groups. 3. State that the control group uses marijuana but not cigarettes. 4. Does your project have a code of ethics? Please include it in your manuscript. 5. Determine the type of blood sample in terms of venous or arterial in the procedure study. 6. In the results section, the second paragraph, line 7, the LDH variable is written as LD. 7. It seems you meant LDH. Please correct it. 8. The results of the study should be reported either in the text or in the form of a table. Avoid bringing the same information in the text and table. 9. In Table 1, all abbreviations, including KG, U, L, MD, etc., should be written at the bottom of the table as table guides. 10. In Table 1 and in the text of the report, the figures should be reported in the form of mean and standard deviation as shown in the figure.... pay attention to the red highlighted part and make corrections accordingly.... Mean \pm SD 11. Why is the conclusion not written at the end of the study? 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>
