If you have suggestion of additional references, please mention in the review form. Yes</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p> | <p>1.The current review is important due to potato blight has been one of the major biotic factors limiting potato production which results in food insecurity. The use of several disease management approaches has been adopted by farmers. Most of these methods are not effective because most growers don't have the proper knowledge of the approaches. The chemical method seems to be the most effective but the cost is high and the negative effects on the ecosystem are alarming.</p> <p>2. The study needs to review the results of previous studies and include tables and statistics.</p> <p>3. 3. The written discussion needs more explanations.</p> <p>4. Based on the conclusions of the research, the authors need to add a description of suggestions and added value for other researchers or readers</p> | |
