

Review Form 1.7

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_106426
Title of the Manuscript:	The Influence of Home Delivery on maternal mortality in Tanzania. The case of the Longido district
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes the manuscript is important and good read for the scientific community with important facts established</p> <p>Could be more comprehensive with the title: The Influence of Home Delivery on maternal mortality in Longido District of Tanzania: A Mixed Method Study</p> <p>Significant findings should be stated on the result section with statistical figures as commented in the manuscript. A statement as written on association may not be enough Subsections and structure is scientifically appropriate. The Abstract is better structured</p> <p>Yes the manuscript is scientifically correct, it is systematic and reproducible</p> <p>References are sufficient in view of the scope and coverage. The references are very recent mostly within 5 years period</p> <p>The author(s) need(s) to add at the result section important and significant quantitative and qualitative findings. The only quantitative data in the result section is maternal mortality rate trend from the district report. No FGD reports were stated except the KI report. Since quantitative, qualitative including KI and FGD instruments were used, significant findings of each need to be reported</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes, the quality of English was suitable for scholarly communications</p>	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
