

Review Form 1.7

Journal Name:	Journal of Engineering Research and Reports
Manuscript Number:	Ms_JERR_107372
Title of the Manuscript:	Appraisal of Structural Integrity Assessment Methodology and Reports of Existing RC Building Structures in Ghana
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. The paper presents the non-conformities found after analysing the structural integrity assessment methodology and the reports of existing RC building structures in Ghana. A national standard reporting format has been developed and recommended for adoption in structural integrity assessment and reporting work for existing RC building structures in Ghana and beyond.</p> <p>2. Title is fine and suitable</p> <p>3. yes</p> <p>4. yes</p> <p>5. yes</p> <p>6. All the cited references are relevant to this research.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>English language fine.</p>	
<p>Optional/General comments</p>	<p>The paper presents in detail the problems found after studying the existing reports. At the same time, it is presented in clear logic, corresponding to the studied problem, and the content should have the standard format recommended for the assessment of structural integrity. In addition to these reports, the monitoring of behavior over time is one of the components of the quality system in construction. This monitoring must be carried out throughout the lifetime of any construction in the form of periodic controls, carried out in accordance with the monitoring projects developed by approved specialists, respecting the provisions of the technical regulations.</p> <p>I appreciate the author's contribution to the field of security and safety in construction.</p>
