

Editor's Comment:

I have two important remarks, both of them regarding IVI (i.e. Importance Value Index):

1) Abbreviations should never be used in Abstract as well as Conclusion without their explicit designation so, please, complete your text accordingly

2) IVI, which is the main decisive and conclusive parameter for all the study should be presented quantitatively in the Results section under the format of a Table and an histogram.

After these points above have been addressed the manuscript can be considered acceptable for publication in IJECC.
