	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments 1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript) 2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title) 3. <b>Is the abstract of the article comprehensive?</b> 4. <b>Are subsections and structure of the manuscript appropriate?</b> 5. <b>Do you think the manuscript is scientifically correct?</b> 6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b> <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	1. The research is important for the scientific community at the national level. The purpose, the problem and the solutions are well formulated and highlighted. The use of microbial cultures to stimulate growth, and especially of mycorrhizae, gave very good results and significant increases in the analyzed parameters. Materials and methods are described in detail. 2. The title reflects the content of the manuscript. 3. The summary complies with the requirements of the journal 4. I recommend noting sections and subsections. 5. The biofertilizers and mycorrhizae in special represent a topic of interest worldwide, which is why the data are valuable from a scientific point of view. 6. In general, bibliographic references are older than ten years, if possible, I recommend the introduction of recent references.	
<b>Minor</b> REVISION comments 1. <b>Is language/English quality of the article suitable for scholarly communications?</b>		
<b>Optional/General</b> comments
