

## Review Form 1.7

Journal Name:	<b>International Journal of Plant &amp; Soil Science</b>
Manuscript Number:	<b>Ms_IJPSS_104733</b>
Title of the Manuscript:	<b>Seasonal activity and diversity of insect fauna collected through light trap in protected and unprotected conditions during rabi season</b>
Type of the Article	

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

## Review Form 1.7

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p>3. <b>Is the abstract of the article comprehensive?</b></p> <p>4. <b>Are subsections and structure of the manuscript appropriate?</b></p> <p>5. <b>Do you think the manuscript is scientifically correct?</b></p> <p>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p>1. The manuscript is essential for the scientific community. This manuscript is a fundamental work for pest control inside and outside a polyhouse. It provides the species composition and their active duration during the rabi season. From the results of this research, further studies on integrative pest management can be carried out to reduce the risk of pests in agricultural crops.</p> <p>2. The title of the article fully states the content of the article.</p> <p>3. The abstract of the manuscript comprehensively summarizes the research.</p> <p>4. The subsections and structure of the manuscript are all appropriate.</p> <p>5. As far as I am concerned, the manuscript is scientifically correct.</p> <p>6. The references are sufficient and up-to-date.</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>In my opinion, the English quality of the article is not yet suitable for being an international scientific paper. The author(s) should check English carefully. There are many English writing issues. Hope to receive a better revision next time.</p>	
<p><b>Optional/General</b> comments</p>	<p>This research is a good start for studying pest management in agricultural crops. The results of this manuscript will be essential data for scientists and farmers to choose or conduct an appropriate strategy for reducing the damage of insects to the productivity of the farm.</p> <p>However, the author(s) should pay more attention to writing. English writing is a significant issue in this manuscript. I have made minor changes in the main text, but revising it more carefully is better. Furthermore, there are some inconsistencies in formats, as I gave comments in the manuscripts. Please revise it as carefully as possible. Moreover, providing some illustrations (photos, figures) of collected species might be more attractive (if possible).</p>	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
