

Editor's Comment:

Based on the recommendations of both the reviewers, manuscript may be accepted for publication in JABB.

However, as pointed out by the reviewer too, there are grammatical errors in the manuscript. I have gone thru the revised manuscript peripherally and found that still there are errors. For example, opening sentence in the Abstract itself ' The objective of this study was to evaluate biologically, the thrombotic risk in children with idiopathic nephrotic syndrome (INS) in Abidjan' must be 'The objective of this study was to evaluate the thrombotic risk in children of Abidjan suffering with the idiopathic nephrotic syndrome (INS).

Similarly, there are other errors too.

I suggest to correct the errors.
