

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p><u>Compulsory</u> REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>		
<p><u>Minor</u> REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	There are some grammatical mistakes, please check the spelling again!	
<p><u>Optional/General</u> comments</p>	<ol style="list-style-type: none"> In the introductory part, several bibliographical sources showing the importance of the cultivation of this mushroom in Nigeria. What other categories or species of mushrooms are cultivated in Nigeria? Suggestion: a description of this species of mushroom (fruiting body, leg, flesh, microscopic characteristics), and the way of cultivation and exploitation (both culinary and medicinal) would be indicated. The material and method part should be structured more explicitly, the paragraphs can be numbered, and explanations should be given more illustrative. How do these substrates affect the environment? As a suggestion: In the results and discussions section, the tables should be placed immediately after specifying them in the text. After positioning the table, the explanations will be presented. It would also be appropriate to indicate, under each table, the source of the data, how those data were obtained, and what statistical methods were used. In the "conclusions" section, you can add some benefits of mushroom cultures, what their main uses are, and whether they may have negative effects on the human body in other culture environments. Also here, it should be specified what is new in your research compared to other similar studies? Please remark: some references are not included in the content of the research, e.g. Razak, Shivute....
