Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>This work should be published immediately after making the final minor adjustments, since its argument is very good and it reveals a scientific way in which this large number of butterflies can be identified according to the abundance by seasons and types of vegetations.</p> <p>Yeah! The Manuscript is important to the scientific community and also to broaden the knowledge of the identification of the different species of butterflies to demonstrate the quality of the environment and ecosystems.</p> <p>In my opinion, the title of the article is perfectly consistent with the work that has been done in the investigation.</p> <p>The summary perfectly details what was done in the article, that is, it details the entire research process.</p> <p>The Structure is regularly appropriate, due to the fact that it must be sent in a word program file, and in this case order tables and photos but some are not of good resolution, they must use the original images for the final article, so they must examine it carefully .</p> <p>Yes, it is scientifically correct. With knowing the procedures used in the study in which the species of butterflies and their usefulness are identified.</p> <p>The References used in the article are those necessary. And even in studies you can use a few. This has a better presentation if it is numbered in bold.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The details are easily and quickly corrected to give a better meaning to the writing of the article and thus broaden its understanding, without giving relevance to the number of corrections detected and improved in order to improve this article to be published. Remember that it is better to send the article in the WORD program.</p>	
<p>Optional/General comments</p> <p>Este artículo nos muestra UN proceso de estudio sobre Las mariposas lo cual desempeñan un papel vital en el ecosistema, actuando Como polinizadores, indicadores de contaminación, plagas y depredadores, una buena fuente de alimento y siendo de importancia estética, económica y ecológica.</p>	<p>Examine the article carefully before publishing it, since the corrections, although few in number, do not affect the publication, therefore the final touches must be refined so that the satisfactory publication is carried out in favor of the knowledge of the different species of butterflies present in SETHU BHASKARA FIELDS, KARAIKUDI, TAMIL NADU, SOUTH INDIA.</p> <p>The work is very well oriented, however, despite the multiple writing details they are not relevant because they are minor, the work is well formulated, the research guides us towards a study on the diversity and abundance of butterflies (lepidoptera: rhopalocera) at the sethu bhaskara college of agriculture and research foundation, karaikudi, tamil nadu, south india, which aims to pinpoint the abundance of all lepidopteran families present in this field.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><u>(If yes, Kindly please write down the ethical issues here in details)</u></p>
