	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1- In general, it is a nice manuscript, and it is scientifically strong and technically sound.</p> <p>2- The title and the abstract of the article are suitable to the article content.</p> <p>3- The article is well structured.</p> <p>4- Need to check this reference, it's not listed in the reference list (Amjath-Babu et al. (2017)) other references are recent and good.</p> <p>Here is a suggested manuscript related to climate changes you may need to cite; https://doi.org/10.1155/2020/8582659 https://doi:10.1016/j.scs.2020.102088</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Its good considered as minor revision.</p>	
<p>Optional/General comments</p>	<ul style="list-style-type: none"> - Absolutely impressive topic with good practice of academic paper approach: I-M-R-D. - Very nicely laid out solutions and conclusions. - Well presented data analysis where respondents identified significant changes in rainfall patterns, including shortened planting seasons, reduced rainfall amounts, extreme dry spells, heavy rainfall, erratic patterns, and shifts in onset and cessation, - The adoption of climate change adaptation strategies was analyzed using a probit model to determine the factors that influence this adoption, and this gives a clear view of the issue. - Based on the result analysis the farmers are strongly agreed to the adaptation technique strategy because the opinions of some farmers tend not to plant for fear of stopping it again. - It's concluded Educating farmers about climate change and appropriate adaptation methods is crucial. 	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
