PART 1: Review Comments

Reviewer Comments:	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)

Review Form 1.7

<p><u>Compulsory</u> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Revision comments: The authors describe a rare but devastating syndrome that is potentially avoidable. Hence, every clinician irrespective of the field should be aware of this syndrome</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title) Revision comments: Can be modified to "Nicolau Syndrome: An Iatrogenic Drug Reaction Caused by Bupivacaine Injection as Spinal Anaesthesia: A description of 2 cases and literature review</p> <p>3. Is the abstract of the article comprehensive? Revision comments: Yes</p> <p>4. Are subsections and structure of the manuscript appropriate? Revision comments: Yes</p> <p>5. Do you think the manuscript is scientifically correct? Revision comments: Yes</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. Revision comments: Yes <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u> Revision comments: Additional suggestions: clinical photographs of the lesions and biopsy slides/findings will make the manuscript more robust</p>	<p>1. I congratulate the authors for describing a rare disease nicely.</p> <p>2. Sentences like "Idiopathic is the exact pathology" should be avoided, but to write that exact pathophysiology is not known</p> <p>3. Term "idea" better be changed to "hypothesis".</p> <p>4. "are most likely the primary mechanisms"</p> <p>5. "who had been experiencing" to "who had dysmenorrhea"</p> <p>6. 2.1 Case 1 , first sentence is a sentence fragment , kindly write a short sentences that are complete</p> <p>7. "Following negative aspiration, a 0.125% BUPIVACAINE injection was recommended and advised for the monitor vitals and was administered gently over ten minutes." Please rewrite for clarity</p> <p>8. Please avoid long sentences, small clear sentences are much easier to read and understand</p> <p>9. Please avoid passive voice, although its not a rule.</p> <p>10. "keep in mind." Please change to "remember"</p> <p>11. Please avoid informal words.</p> <p>12. The manuscript needs a little refinement regarding grammar and English language</p> <p>13. Please provide clinical photographs of the patients' lesions</p> <p>14. Please avoid unnecessary capital letters</p> <p>15. Was skin biopsy done for any of the patients? Kindly tell the findings if done.</p>	
<p><u>Minor</u> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications? Revision comments: Needs minor revision regarding language/English quality</p>		
<p><u>Optional/General</u> comments</p>
