PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The manuscripts if significant for scientific community. The availability of sulphur which increases the contents of soluble salt either in water or soil and consequently increase the salinity levels. Therefore, the knowledge for precautionary measures is imperative in the community.</p> <p>The title is suitable but there is the need for the Author to attach name of the study area, district, location or country for ease and precise reference. I suggest the title as <i>The distribution and determination of correlations between different forms of sulphur in surface soil in..... (attach study areas, places, districts or country).</i></p> <p>It is comprehensive.</p> <p>Yes, they are. However, do not break your table into two pages. A complete page should be on a page.</p> <p>It is scientifically correct.</p> <p>The references are okay but not recent. Only one reference is 2012 while others are way years old.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>It is suitable but need polishing in grammar</p>	
<p>Optional/General comments</p>
