

**Editor's Comment:**

Regarding the above paper sent:

1. "PERSISTENT PRICE INCREASE OF GOODS IN ENUGU STATE: POSTGRADUATE STUDENTS OF BUSINESS EDUCATION PERSPECTIVE", I agree with this proposed title.
2. The correct one is Conclusions (though there is only one final idea).
3. I want the author to underline that the statistical-mathematical tool came to strengthen the reality of the influence of the factors considered on the price provided.

OK for publishing.
