

SDI Review Form 1.6

Journal Name:	Asian Journal of Biotechnology and Genetic Engineering
Manuscript Number:	Ms_AJBGE_55804
Title of the Manuscript:	Applications of Protoplast Fusion in Plant Biotechnology
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> First of all, this is a Short Review, not a Review article. The manuscript is too short for a review (it has only 5 pages, the rest of the pages is the Reference list), and for this reason I recommend to improve the manuscript with more detailed description and comments, otherwise the Editorial board should reconsider the classification of the manuscript into another category (Short review instead of Review Article). Please reformulate the aim of review. "This review, aim at reviewing the biotechnology application of protoplast fusion such as production of useful metabolites, gene editing (crispr mutagenesis), improvement of nutrition production, introduction and establishment of disease resistance plants, creating nitrogen-fixing symbioses and production of herbicide resistant plants" does not have any sense in English. Please reformulate the phrase: " Most nitrogen exist in the atmosphere and the ability fix atmospheric nitrogen through the nitrogenase enzyme complex is restricted to some bacteria and where the bacterian abd plant live in symbiotic relationship provide the reiches sources of nitrogen to plants [48,49]." All Latin names has to be written in <i>italic style</i> (ex. Klebsiella pneurnoniae, became <i>Klebsiella pneurnoniae</i>). Control all the manuscript. Is not correct to start a phrase like this: "[64] Reported the use..." or "[65] also reported the use of ...". Please insert the name of the first author and "et al." and then give the reference number. Please control all the manuscript in order to correct this issue. Please reformulate the conclusions based on the sub-chapters addressed in the text and only then formulate the general conclusion. 	
Minor REVISION comments	<ol style="list-style-type: none"> Please re-control the typo errors in manuscript. A complete revision of English is necessary. The Reference list should be adjusted in order to uniformed the writing method (pay attention at spaces, point, commas, etc 	
Optional/General comments
