

**Editor's Comment:**

I trust it is urgent to have my approval with respect to the article entitled Pre-Concept Inquiry of "Matter State Changes" in Junior High School Science, which is an empirical paper of 8 pages and in light with the respected peer-reviewers' fruitful and constructive comments, suggestions and recommendations which the final paper took on board prior to publication. Therefore, without much ado, allow me to give the green light for its publication otherwise the respected author(s) would be penalised for all his/her/their efforts in producing a well-written paper and in good and intelligent English after some (minor) amendments.

Congratulations to the respected author(s) thanking the peer-reviewers for the comments, as mentioned.
