

Editor's Comment:

I have gone through the MS, comments of the reviewers and revised version of the MS.

Authors need to pay attention to the reviewers' comments. They have not addressed comments:

1. The method of root, shoot fresh weight, and length measurement need to be explained.
2. The meaning of GAB? should be given in table caption.
3. English usage needs improvement in the MS. For the first line of Introduction, the authors changed "will be" to "is" but the sentence is now wrong.

After the suggested changes are incorporated, the MS may be accepted for publication.
