<p><b>Compulsory</b> REVISION comments</p> <p>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p>3. <b>Is the abstract of the article comprehensive?</b></p> <p>4. <b>Are subsections and structure of the manuscript appropriate?</b></p> <p>5. <b>Do you think the manuscript is scientifically correct?</b></p> <p>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><b><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></b></p>	<p>I consider that it is convenient to point out the intention and the effort that the authors make in wanting to make the manuscript and bring an experience to a research product, that is certainly valuable and recognized. I think it would be an interesting model to improve and clearly establish originality.</p> <p>Your work is interested, written well, and organized. However, there are some comments should be considered before publishing, in this way, the scientific quality of the manuscript would be improved.</p> <p>I suggest the authors update the bibliography, many of the citations are more than 15 years old, therefore I suggest adding recent references which address the issue in question. Suggested citations are for genuine scientific reasons that emphasize the current topic of study in context.</p> <p>Authors should consider the corrections suggested by the reviewers. In this way the postulated manuscript would be reasonably presented, fluent reading.</p>
